CORE SKILLS

MOBILE
React Native, Flutter / Dart, biometric auth (Face ID / Fingerprint), secure storage, SSL pinning, offline support, push notifications, App Store & Play Store release

FRONTEND
React, Angular, Next.js, TypeScript, Redux Toolkit & RTK Query, NgRx, RxJS, Tailwind CSS, SASS, design systems, Figma-to-code

BACKEND
Node.js, Express, NestJS, REST, GraphQL, MongoDB, SQL Server, ASP.NET Core

BLOCKCHAIN / WEB3
Multi-chain integration across Bitcoin, Ethereum, Solana, BSC, Arbitrum, Polygon, and Tron — wallets, cross-chain bridging, on-chain order flow, custody, compliance screening, and fiat on/off-ramps

PLATFORM
Docker, Azure DevOps, GitHub Actions, Firebase, Matomo, multi-environment deployment

PRACTICES
Architecture ownership, technical direction, Jest, code review, mentoring, performance, Agile / Scrum

HIGHLIGHTS

- ~9 years shipping regulated fintech products
- Clients in Switzerland, Trinidad & Tobago, the UAE, and Paraguay
- 6+ apps live on the App Store and Play Store
- Led frontend and mobile teams of up to 5+ engineers
- One codebase serving two banks (SGKB, GKB)
- Multi-chain crypto trading: 8,000+ assets across 7 networks

EDUCATION

BSc, Computer Science & Engineering
University of Liberal Arts Bangladesh
2013 — 2017 · CGPA 3.21 / 4.00

LANGUAGES

English
Professional working proficiency

Bangla
Native

AVAILABILITY

Open to new roles — on-site in Dhaka, hybrid, or fully remote. Any stack or domain.

Jihad Hasan Joy

STAFF SOFTWARE ENGINEER

PROFILE

Staff Software Engineer with nearly 9 years building secure, regulated mobile and web products — retail banking, pension platforms, national payment networks, and a cryptocurrency exchange — for clients in Switzerland, Trinidad & Tobago, the UAE, and Paraguay. Specialized in React Native and Angular, with hands-on backend work in Node.js and Express. I own delivery end to end: architecture and state management, API contracts, biometric security and identity verification, performance, and App Store release — and I lead the engineers who ship it. Open to work across any technology stack or domain.

EXPERIENCE

Staff Software Engineer · SELISE Group — Dhaka · Feb 2023 — Present

- Own end-to-end architecture for React Native, React, and Angular products serving banking, pension, and crypto clients in production.
- Lead cross-functional delivery with design, backend, and QA — from discovery through App Store and Play Store release.
- Define frontend standards for state management, testing, security, and releases across project teams.
- Design API contracts and build Node.js/Express integrations alongside REST and GraphQL backends.
- Implement regulated-product requirements: biometric login, remote identity verification, secure storage.
- Build multi-chain crypto surfaces: wallets, bridging, and live on-chain order flow.
- Mentor engineers through code review and pairing; cut bundle sizes and load times across shared codebases.

Software Engineer · Brain Station 23 — Dhaka · Sep 2020 — Jan 2023

- Built secure mobile banking apps with Face ID and fingerprint auth, secure storage, and SSL pinning.
- Led a 5+ engineer frontend team, setting code quality standards and reviewing delivery.
- Delivered Angular and React SPAs with reusable component libraries and admin dashboards.
- Shipped releases through Docker-based Azure DevOps pipelines across dev, stage, and production.

Full-Stack Developer · Samurai System — Dhaka · Nov 2017 — Aug 2020

- Built dynamic drag-and-drop dashboard interfaces in Angular for a digital signage platform.
- Developed REST APIs in ASP.NET Core and pixel-perfect responsive layouts with Bootstrap.
- Set up dev, stage, and production environments with the accompanying Docker deployment pipelines.

SELECTED PROJECTS

DBforKids | Children's digital banking · SGKB iOS · Android · GKB iOS · Android — Frontend lead
Pocket-money banking for children aged 6–13 with a parental cockpit; architected per-bank theming so both institutions ship from one codebase.
Stack — React, React Native, Redux Toolkit, RxJS, NgRx, Jest, ECharts, Firebase, Matomo

GKB Gioia 3a | Pension app — Graubündner Kantonalbank · iOS · Android — Frontend lead
Fully digital 3a pension accounts — remote onboarding through portfolio management, with Onfido identity verification and Matomo funnel analytics.
Stack — React Native, Redux, Jest, Firebase, Onfido, Matomo, ECharts, Tailwind CSS

X4T | Cryptocurrency exchange — Technical lead
Paraguay's leading exchange: zero-fee on-chain trading across 8,000+ assets and seven networks, with cross-chain bridging and Guaraní/USD fiat rails. Led web, mobile, and Node.js backend architecture.
Stack — React, React Native, Node.js, Express, TypeScript, Redux Toolkit, Web3, ECharts, Tailwind CSS

Convenience Pay | Fuel payment network — Unipet — Frontend lead
Nationwide smart-card payment platform for a petroleum retailer; led frontend architecture and the reporting suite serving fleet, merchant, and internal users.
Stack — Angular, RxJS, NgRx, Google Maps API, ECharts, Bootstrap, SASS

Finsy | Pension & personal finance · iOS · Android — Frontend lead
Income, expenses, insurance, and pension planning in one platform; built the Angular web client and React Native app against one API surface, plus in-app video consulting.
Stack — Angular, React Native, Redux Toolkit, RxJS, NgRx, Google Maps API, ECharts, Tailwind CSS

ShopperOn | Live shopping marketplace · iOS · Android — Frontend lead
Real-time video commerce where live hosts sell on stream; built the Agora streaming and in-stream purchase flows and shipped the buyer app to both stores.
Stack — React Native, Redux, Agora, Firebase, ECharts, Tailwind CSS
